

1. Převed' správně jednotky objemu:**PAMATUJ SI !** **1 hl = 100 l** a opačně (100 l = 1 hl)

 $6 \text{ hl} = \underline{\hspace{2cm}} \text{ l} \quad 9 \text{ hl} = \underline{\hspace{2cm}} \text{ l} \quad 10 \text{ hl} = \underline{\hspace{2cm}} \text{ l} \quad 100 \text{ hl} = \underline{\hspace{2cm}} \text{ l}$

$300 \text{ l} = \underline{\hspace{2cm}} \text{ hl} \quad 500 \text{ l} = \underline{\hspace{2cm}} \text{ hl} \quad 200 \text{ l} = \underline{\hspace{2cm}} \text{ hl} \quad 1200 \text{ l} = \underline{\hspace{2cm}} \text{ hl}$

$3 \text{ hl } 10 \text{ l} = \underline{\hspace{2cm}} \text{ l} \quad 5 \text{ hl } 50 \text{ l} = \underline{\hspace{2cm}} \text{ l} \quad 6 \text{ hl } 6 \text{ l} = \underline{\hspace{2cm}} \text{ l} \quad 6 \text{ hl } 60 \text{ l} = \underline{\hspace{2cm}} \text{ l}$

$8 \text{ hl } 60 \text{ l} = \underline{\hspace{2cm}} \text{ l} \quad 1 \text{ hl } 22 \text{ l} = \underline{\hspace{2cm}} \text{ l} \quad 3 \text{ hl } 17 \text{ l} = \underline{\hspace{2cm}} \text{ l} \quad 3 \text{ hl } 3 \text{ l} = \underline{\hspace{2cm}} \text{ l}$

$270 \text{ l} = \underline{\hspace{1cm}} \text{ hl } \underline{\hspace{1cm}} \text{ l} \quad 207 \text{ l} = \underline{\hspace{1cm}} \text{ hl } \underline{\hspace{1cm}} \text{ l} \quad 123 \text{ l} = \underline{\hspace{1cm}} \text{ hl } \underline{\hspace{1cm}} \text{ l}$

$101 \text{ l} = \underline{\hspace{1cm}} \text{ hl } \underline{\hspace{1cm}} \text{ l} \quad 333 \text{ l} = \underline{\hspace{1cm}} \text{ hl } \underline{\hspace{1cm}} \text{ l} \quad 990 \text{ l} = \underline{\hspace{1cm}} \text{ hl } \underline{\hspace{1cm}} \text{ l}$

Doplň, aby to bylo pravda:

$270 \text{ l} + \underline{\hspace{1cm}} \text{ l} = 3 \text{ hl} \quad 20 \text{ l} + \underline{\hspace{1cm}} \text{ l} = 1 \text{ hl} \quad 488 \text{ l} + \underline{\hspace{1cm}} \text{ l} = 5 \text{ hl}$

$165 \text{ l} + \underline{\hspace{1cm}} \text{ l} = 2 \text{ hl} \quad 450 \text{ l} + \underline{\hspace{1cm}} \text{ l} = 5 \text{ hl} \quad 610 \text{ l} + \underline{\hspace{1cm}} \text{ l} = 7 \text{ hl}$

2. Vypočítej OBVOD čtverce: podle str. 52 **o = obvod (je součet všech stran!)**

$o = a + a + a + a \text{ nebo nejlépe } o = 4 \cdot a$

$(o = AB + BC + CD + DA) \quad o = 4 \cdot 4$

$o = 4 \text{ cm} + 4 \text{ cm} + 4 \text{ cm} + 4 \text{ cm} \quad o = 4 \cdot 4 = \underline{\hspace{1cm}} \text{ cm}$

Obvod čtverce ABCD je $\underline{\hspace{1cm}}$ cm.

3. Vypočítej obvody štvrců o stranách - dosazuj do vzorce: $o = 4 \cdot a$

A/ $a = 8 \text{ cm}$ $o = 4 \cdot a$ $o = 4 \cdot 8$ $o = 32 \text{ cm}$

B/ $a = 5 \text{ cm}$ $o = 4 \cdot a$ $o = 4 \cdot \underline{\hspace{1cm}}$ $o = \underline{\hspace{1cm}} \text{ cm}$

C/ $a = 10 \text{ cm}$ $o = 4 \cdot a$ $o = 4 \cdot \underline{\hspace{1cm}}$ $o = \underline{\hspace{1cm}} \text{ cm}$

D/ $a = 70 \text{ cm}$ $o = 4 \cdot a$ $o = 4 \cdot \underline{\hspace{1cm}}$ $o = \underline{\hspace{1cm}} \text{ cm}$

E/ $a = 30 \text{ cm}$ $o = 4 \cdot a$ $o = 4 \cdot \underline{\hspace{1cm}}$ $o = \underline{\hspace{1cm}} \text{ cm}$

F/ $a = 50 \text{ cm}$ $o = 4 \cdot a$ $o = 4 \cdot \underline{\hspace{1cm}}$ $o = \underline{\hspace{1cm}} \text{ cm} = \underline{\hspace{1cm}} \text{ m}$

G/ $a = 1000 \text{ m}$ $o = 4 \cdot a$ $o = 4 \cdot \underline{\hspace{1cm}}$ $o = \underline{\hspace{1cm}} \text{ m} = \underline{\hspace{1cm}} \text{ km}$
